Appraisal No. 1915
Page : 1 of 1

PURPOSE OF VALUATION : *INSURANCE*

ITEM : **Sapphire and Diamond Cluster Ring.**

STYLE :

An 18ct white gold shank has tapered ends to 3.6mm tall that join a round bezel and flared wire basket... this measures 7.7mm to 6.5mm tall and forms applied claws on a cast cluster top. The Top is cast and has an oval outline and measures 17.7mmX13.7mm.

The shank has a creased profile and measures 1.4mm to 3.1mm wide with a reverse taper and tapers to 1.25mm thick at the back.

CONTENT :

Set are nine sapphires and eight round brilliant cut diamonds.

The sapphires are a bright medium dark blue, transparent and moderately including and with some color banding. The sapphires are baguette cut and measure approx. 3.7mmX2.9mm to 4mmX3.2mm

The diamonds have been graded while mounted as Color H and Clarity SI2/I1 and each weigh approximately 0.04ct.

COMMENTS :

Assembled cast components, the ring is well finished and in a good condition and weighs 5.1grms.

The diamond weight has been estimated using a Leveridge gauge
An Indemnity or a cash pay-out of the resale value may differ.

U.S. Exchange Rate : 0.72

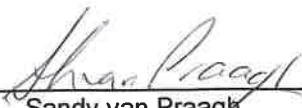

This allows to replace with a similar new item from a Retail Jewelry Store.

Estimated Replacement Value :

Three Thousand Five Hundred Dollars.....\$3500
